Early Warning Issue Date:	20 November 2012

Early Warning Description – This will be posted publicly:

In the view of the GAC representatives of Germany, the applications for “.hotel”, “.hotels” and “.hoteis” should definitely be treated together in ICANN’s evaluation process.

Reason/Rationale for the Warning – This will be posted publicly:

The proposed strings, .hotels/ .hotel/ .hoteis are common generic terms relating to a market sector.

Restricting common generic strings for the exclusive use of a single entity could have unintended consequences, including a negative impact on competition.

Early warnings provide a mechanism to initiate a discussion between a government and an applicant on particular issues or questions. It is intended that a constructive dialogue through this process will assist applicants to better understand the concerns of governments, and help governments to better understand the planned operation of proposed gTLDs.

Possible Remediation steps for Applicant – This will be posted publicly:

GAC Member(s) to identify possible remediation steps to be taken by the applicant

The applicants for “.hotel”, “.hotels” and “.hoteis” should specify transparent criteria for third party access to the TLD. These criteria should be appropriate for the types of risk associated with the TLD, and should not set anti-competitive or discriminatory conditions relating to access by third parties.

Further Notes from GAC Member(s) (Optional) – This will be posted publicly:
