

## GNSO POLICY DEVELOPMENT UPDATE

### ISSUE

Locking of a Domain Name subject to UDRP Proceedings

UPCOMING IMPORTANT DATES: None

### SUMMARY

The GNSO Council has initiated a policy development process (PDP) to address the limited issues associated with the locking of a domain name subject to Uniform Dispute Resolution Policy (UDRP) proceedings. Currently there is no requirement to lock names during the period between filing a complaint and the commencement of proceedings, and no definition of ‘status quo’ (a term used in the UDRP), which has resulted in different interpretations and confusion. The Working Group was tasked to make recommendations to the GNSO Council to address the issues identified with the locking of a domain name subject to UDRP Proceedings. The WG submitted its [Final Report](#) containing seventeen full consensus recommendations to the GNSO Council on 5 July 2013. These recommendations are expected to usefully clarify and standardize how a domain name is locked and unlocked during the course of a UDRP Proceeding for all parties involved. The GNSO Council unanimously adopted the Final Report and its recommendations at its meeting on 1 August. The recommendations were posted for public comment prior to being considered for adoption by the ICANN Board (see <http://www.icann.org/en/news/public-comment/locking-domain-name-recommendations-02aug13-en.htm>). One comment was received in support of the recommendations. The Board adopted the recommendations at its meeting on 28 September 2013.

### GAC ENGAGEMENT OPPORTUNITY STATUS

Following the adoption of the recommendations by the ICANN Board, an Implementation Review Team has been formed to work with ICANN Staff on the development of the implementation plan. This implementation plan will eventually be published for public comment.
