**ICANN | GAC**  
Governmental Advisory Committee

# ATRT3 Questions to GAC

---

1. Even under the new process between GAC and Board, sometimes after Board accepts GAC advice, there is no further control on the implementation, sometimes the advice does not reach the final goal. Do you believe a Performance Key indicators on what really happened with this advice could be of value for GAC?
2. Is GAC satisfied with the interactions with the BOARD? Is satisfied with interaction with other communities? In both cases what kind of improvements would GAC like to see implemented?
3. What is your perception of transparency within policy development process, including the EPDP?
4. Is there anything else you'd like to share from the perspective of accountability and transparency?
