

Policy Development Process (PDP) Update

‘Thick’ WHOIS Policy Development Process

10 December 2018

Upcoming dates

By 31 May 2019: The registry operator must begin accepting Thick WHOIS data from registrars for existing registrations in .COM, .NET and .JOBS.

Resolution

Summary

ICANN specifies WHOIS service requirements through its agreements with gTLD registries and registrars. Registries have historically complied with their WHOIS obligations under two different models, characterized as “Thin” and “Thick” WHOIS registries. In a Thin registration model the Registry only collects and publishes the minimal information associated with the domain name from the registrar (such as DNS technical information). All of the registrant’s contact information is maintained by the registrar, which publishes it via their own WHOIS services. In a Thick registration model the registry collects both sets of data (domain name and registrant) from the registrar and in turn publishes that data via WHOIS.

The ICANN organization and the Thick Whois IRT have identified two steps for the Thick Whois Policy recommendations and agreed that their implementations could be decoupled:

- Consistent Labeling and Display of WHOIS output for all gTLDs
- Transition from Thin to Thick for .COM, .NET and .JOBS

Both policies were published on 1 February 2017 consisting of three effective dates:

- Consistent Labeling and Display of Whois output for all gTLDs by 1 August 2017
- Transition from Thin to Thick for .COM, .NET and .JOBS (for new registrations) by 1 May 2018
- Transition from Thin to Thick for .COM, .NET and .JOBS (for existing registrations) by 1 February 2019

The Consistent Labelling and Display of RDDS Output for All gTLDs policy has completed implementation with the policy effective date of 1 August 2017.

For .COM and .NET, Verisign, the registry operator, has proposed changes to its Registry-Registrar Agreement (RRA) to accept Thick WHOIS data. However, Verisign and RrSG hit an impasse when they could not agree on RRA proposed by Verisign. During its meeting on 25 October 2018, the ICANN Board adopted a resolution to defer enforcement of the policy (see

<https://www.icann.org/resources/board-material/resolutions-2018-10-25-en#1.d> [This](#) effectively allows additional time for implementation before enforcement takes effect for the Thin to Thick Transition policy.

GAC Engagement Opportunity Status

Following the publication of the policies, the Implementation Review Team is working with the ICANN organization on the implementation of the policies.
