**Early Warning Description – This will be posted publicly:**

American Bible Society is seeking to have exclusive use of the gTLD ‘BIBLE’. There is no plan in the application to address the specific needs of the approximately 27 million Christians in India.

India is a secular country with a large Christian population. Use or this extension is likely to impact upon section of the community unless there are stringent checks and balance with a strong anti-abuse policy.

**Reason/Rationale for the Warning – This will be posted publicly:**

The word Bible is closely associated with the sentiments of millions of Christians residing in India. Under Indian Trade Mark Act Section 9(2) clearly mentions that a mark shall not be registered if it contains or comprises of any matter likely to hurt the religion susceptibilities of any class or section of the citizens of India.

The applicant intends to run the “.bible” gTLD on an exclusive basis, without any regard to the diverse and wide-ranging needs of India’s 27 million plus Christians.

As a result, and based on the provisions of the Indian Trade Mark Act, we believe that the gTLD string “.bible” should be set aside by ICANN.

**Possible Remediation steps for Applicant – This will be posted publicly:**
1. The applicant should show how they will alleviate the religious and social issues that might arise from either the exclusive control of the name of an important religion by a corporation.

2. The applicant should demonstrate how they will ensure that names in the “.bible” gTLD will not be abused by registrants, and will remain sensitive to the religious issues in the Christian religion.

3. Finally, to address the needs of developing nations, the applicant must demonstrate that their gTLD will not disadvantage registrants from developing countries due to economic reasons, or render unable to register names due to cost factors.
