Early Warning Description – This will be posted publicly:

The Government of Germany wishes to observe that the term “gmbh” as an abbreviation is linked to a specific corporate form for companies (“Gesellschaft mit beschränkter Haftung”, which corresponds to a Limited Liability Company or LLC in the English-speaking countries).

Reason/Rationale for the Warning – This will be posted publicly:

The introduction of new generic top-level domains (gTLDs) by ICANN creates new possibilities for various sectors to present themselves on the internet and is therefore basically welcome in terms of a future orientated, globally networked economic policy. In Germany and other German speaking countries, the gTLD “.gmbh” offers many chances for enterprises, which are established in the corporate form of a “Gesellschaft mit beschränkter Haftung” (GmbH) to optimize their presentation in the internet. Therefore, the government of Germany welcomes the efforts of private-sector companies to establish “.gmbh” as a self-explanatory TLD.

In most cases, the average internet user in a German speaking country will expect a SLD like “(name of a company).gmbh” to be used by a company registered as a “Gesellschaft mit beschränkter Haftung”. In Germany, only companies registered as a “Gesellschaft mit beschränkter Haftung” have the right to use the respective abbreviation “GmbH” accordingly. Therefore, there is a legal aspect to be considered in allowing the use of the term “Gmbh” as part of a Second-Level domain. It might be added that companies in the corporate form of a Gmbh enjoy special trust amongst customers on the German market.

Possible Remediation steps for Applicant – This will be posted publicly:

GAC Member(s) to identify possible remediation steps to be taken by the applicant
To enhance the protection against any misuse or misinterpretation of “.gmbh” as part of a domain, Germany suggests an implementation of the following terms as a safeguard:
- Applicants for SLDs under “.gmbh” have to be companies which are already organized as “Gesellschaften mit beschränkter Haftung” according to the regulations valid in Germany, Austria, Switzerland or Liechtenstein, or they should be able to prove that such a registration is pending in at least one of these countries. The compliance of these requirements has to be regularly reviewed.

- Applicants for SLDs have to prove that they are subject to liability as a GmbH by forwarding a full set of valid documents from their respective place of jurisdiction.

**Further Notes from GAC Member(s) (Optional) – This will be posted publicly:**

The government of Switzerland supports this EW (see also the attached e-mail correspondence).
